

Skunks Get “Skunked” with Vaportek

Vaportek Customers explain in **Black & White** how they’ve used our safe, environmentally preferable technology to eliminate difficult **Skunk** odors!

A Servicemaster contractor had a customer call for help when a skunk got into the basement of a house. “I used the Vapor Shark and Bio-C,” he said. “Within 24 hours, the skunk malodor was gone and I had a very satisfied customer. The Vaportek technology work and was not intrusive. The customer said he liked the fragrance of the Vaportek Products.”

A Servpro contractor met the skunk challenge and won! “I didn’t think the Vaportek products would handle this challenge,” he said. “The skunk left a jelly-like glob of spray on the inside of the garage door that was really strong. I sprayed the glob with Bio-C and the malodor almost disappeared. I removed the glob and set up a Vapor Shark. Four hours later, the malodor was gone! Neither I, nor the customer, could believe the effectiveness of the Vaportek products.”

A Connecticut public school had a family of skunks living under some portable classrooms. The maintenance staff had tried just about everything, without success, to remove the malodor. A Vaportek distributor suggested trying Vaportek on the problem. “Using a Restorator and Bio-C, we solved the malodor problem and made the front page of the local newspaper,” said the Vaportek salesman.

A restoration contractor in New York related how one of his customers had a skunk wander

“I can’t say enough good things about the Vaportek products.”

into his garage, apparently looking for food or a new home, and left behind an unwanted malodor. The customer set up a trap to capture the skunk and it worked but the customer realized too late that it was NOT the best solution to the problem. The skunk died and the malodor problem magnified itself a hundred times! “I removed the skunk and surveyed the situation,” said the contractor. “Then, I sprayed everything with Bio-C solution and set up a Vapor Shark unit. Within 6 hours, everything was back to normal. There were NO skunk malodors. I can’t say enough good things about the Vaportek products. The stuff works!”

A Vaportek salesman returned home from work one day to find his “best friend” had encountered a skunk. “The dog got into the house and rolled all over the carpet before I could stop him. What a stench!” he said. “I went to my car and got a Restorator, ECOZ, and Bio-C GP. I set up the Restorator, sprayed the carpet with Bio-C GP, and washed the dog. When I came back into the house, I couldn’t believe the difference. I extracted the carpet using the ECOZ and everything was fine. The Vaportek products worked wonders!”
