# Experience Vaportek's Superior EZ-360<sup>o</sup>™ Organic Odor Neutralizer!

Use the disposable EZ-360<sup>o</sup> to tackle tough athletic odors found in gym/dance bags, lockers, and sports gear including skates and shoes! Our **INTENSE** fragrance eliminates even the toughest odors, while our other fragrances are designed to freshen your environment with Vaportek's custom blend of aromas. The easy-to-use EZ-360<sup>o</sup> consists of a variable vented sphere housing and a special fiber element which has been immersed in a complex blend of select aromatic oils. Our unique dry vapor technology is slowly diffused over the course of a month when vents are twisted into an open position.

## TO USE:

Press firmly along the EZ-360<sup>o</sup>'s seam to open. Open pouch containing fiber pads and fit notched sides together. Do not allow the pads to come into contact with any surfaces other than the housing as contact may damage certain surfaces. Insert pad into the EZ-360<sup>o</sup>'s grooves and snap both sides of the EZ-360<sup>o</sup> closed. Simply twist to adjust dry vapor release, and to close vents when deodorization is not required. Wash hands with soap and water to remove any residue from handling pads.

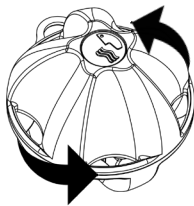

## PRODUCT SAFETY:

- CFC-Free & not formulated to generate ozone
- Contains no added ethyl alcohol
- IFRA compliant
- VOC compliant
- Spill-proof

## INCLUDED ACCESSORIES:

Included with each purchase of an EZ-360<sup>o</sup> is a carabiner aluminum locking clip. Use to clip your EZ-360<sup>o</sup> to lockers, gym bags, and more!

**EFFECTIVE • SIMPLE • FAST-ACTING**
