

VAPORTEK®

Pioneering Simple Solutions for Tough Odors Naturally Since 1979

STATEMENT OF QUALITY CONTROL

Since 1979, VaporTek has been manufacturing a wide variety of air treatment products worldwide. We are committed to providing the utmost in safe and effective products. VaporTek has maintained a rigorous program with our suppliers to ensure all materials supplied to us are consistent with the exact quality standards established at our founding. Further, VaporTek is committed to continuous improvement in all areas of our operation.

To maintain the highest possible standards for quality control, regular on-line inspections are conducted during the manufacturing process by both assemblers and supervisors. First article and roving inspections are conducted by supervisors only, and final product inspection provides additional quality assurance.

Electric products are regularly reviewed by UL agents and meticulously governed by their standards. CULUS marks mean a product has been tested and meets applicable standards for safety and/or performance, including the applicable standards written or administered by the American National Standards Institute (ANSI), Underwriters Laboratories (UL), NSF International (NSF) and others.

Where relevant, CE standards for European markets are also met.

Sincerely,

John D. Bryson, Jr.
President
